

C110EON CARIGNAN

PARRAS VIEJAS

2018 / D. O. MAULE VALLEY

100% CARIGNAN

VINEYARD

Vineyard Characteristics : Situated in the Maule region, this vineyard is located in the Cauquenes region, 35 km in a straight line from the sea between the Coastal mountain range and the Cauquenes river. It corresponds to a traditional plantation, planted on ungrafted, head-trained, rainfed soils and where all the work is done by hand or with horses.. This method makes it possible to produce grapes with thick skin, balanced acidity, concentration of flavors and a unique expression of terroir.

Climate: The climate is Mediterranean with an average maximum temperature of 27°C in the hottest month, January. Rainfall is mainly concentrated in winter, with an annual average of around 700 mm. The marked difference in temperature between day and night favors a correct phenological maturity, preserving its natural acidity and varietal aromas.

Soils: Its soils are of alluvial origin, loamy - clayey and of poor characteristics, thin and with the presence of quartz. Dry soils.

Average age of vines: 100 years.

Clones: Masal.

BARREL AGEING

20 to 24 months in wood. A small part of the final blend is aged in foudres and the balance in 300-liter French barrels (30% new, 70% used).

WINEMAKER'S NOTES

Carignan of intense color. The nose is multi-layered, with red and black fruits predominating, accompanied by spicy and floral aromas along with soft toast and dried fruits from the oak. On the palate it is a wine of great presence, medium volume, fine tannins and great acidity characteristic of old Carignan from the coastal drylands of the Maule region.

FOOD PAIRING

Grilled meat with creamy risotto, Oven roasted lamb leg with vegetables.

ACCOLADES

Descorchados 2024 • **94 Points** /
Latin American Wine Guide - Alistair Cooper & Catad'Or • **93 Points** /
James Suckling Report • **93 Points**.
